

DAY-4

Building Dynamic Frontend Components for my marketplace Project.

Key Achievements:

- ① Dynamic Product Listing and details - Grid layouts with dynamic routing for detailed product pages.
 - ② Category Filtering & Search Bar - Seamless product discovery through categories and search functionalities.
 - ③ Cart & wishlist management - Intuitive components with state management and local persistence.
 - ④ Checkout Flow - A multi-step form for billing, shipping, and payment mockups.
 - ⑤ User Profile & Order History - Personalized pages with saved addresses and past orders.
 - ⑥ Reviews, Ratings & Related Products - Encouraging engagement and guiding purchase decisions.
 - ⑦ Advanced Filtering & Pagination - Ensuring efficient navigation through large product catalogs.
 - ⑧ AI Recommendations - Integrated AI to offer personalized product suggestions.
 - ⑨ Multi-Language support - Enhanced accessibility with dynamic translations.
 - ⑩ Admin Tools & Analytics - Dashboard for product, order, and user management with insightful KPIs. And so much more, including social media sharing, bulk uploads, notifications, and subscription management.
- Documentation & Submission:
Documented my progress and submitted the work on time.
